

## CLEAN, GREEN LAUNDRY

Two mums from Canberra, Penny Allinson and Cheryl Betts, have developed a range of laundry products for the future. Enviroballs are recyclable plastic balls that are thrown into the wash with your clothes, removing the need for laundry detergents and fabric softeners. Enviro Washballs contain small ceramic stones that last up to 1000 washes and contain no chemicals or bleaching agents. The tumbling action of the stones raises the pH level of the water, which in turn allows the water to move through the fabric easily, removing dirt naturally. With no negative impact on grey water, they are also safe for sensitive skin. Enviro Dryerballs reduce drying time by 25 per cent, control static cling, soften laundry and reduce wrinkles. Made from rubber material with multiple tips, they last for years. They won't melt, break or change shape in a hot dryer.

**Enviro Washballs RRP \$49.95;**

**Enviro Dryerballs RRP \$14.95.**
